

# The Creeper Virus

Creeper is a **computer virus** and is the first-ever digital virus, created in 1971. It infected DEC PDP-10 computers running the TENEX operating system. Creeper traveled throughout networked computer systems and printed the message, "I'm the creeper, catch me if you can!" on various nodes.

## Assembly Instructions:

1. Cut out each shape along outside edge.
2. Pre-crease all dashed lines with a ruler and a bone tool.
3. Fold all dashed lines away from you.
4. Spread a thin layer of glue on folded tab.
5. Place tab under corresponding side and press together until glue dries.
6. Repeat until all four shapes are assembled.
7. Glue the three little pyramids on the large one in any configuration.
