Foot-and-Mouth Disease Virus

Foot-and-Mouth is a real virus, which infects cloven-hoofed animals (e.g. cattle, deer, sheep, pigs) often causing death.

Historically, because of its highly mutable nature, it has adversely affected the livestock industry and been difficult to treat.

Though not fully eradicated, foot-and-mouth disease is no longer present in North America, Australia and Europe.

Assembly Instructions:

1. Cut out shape along outside edge.

2. Pre-crease all dashed lines with a ruler and a blunt-edged tool (i.e. a bone tool or pen cap).

3. Fold all dashed lines away from you (i.e. mountain fold).

4. Spread a thin layer of glue on a folded tab.

5. Place tab under corresponding side and press together until the glue dries.

6. Repeat until assembled.
