Koobface is a computer virus, first detected in 2008, which targets social networking websites such as Facebook, MySpace and Twitter.

It sends a message to direct users to click on a video link from a third party website.

It then attempts to gather personal information from the victims such as credit card numbers.

**Assembly Instructions:**

1. Cut out the 2 shapes along outside edges.

2. Pre-crease all dotted lines with a ruler and a blunt-edged tool (i.e. a bone tool or pen cap).

3. Fold all - - - lines as mountain folds, and all - . . - as valley folds.

4. Spread a thin layer of glue on a folded tab.

5. Place tab under corresponding side and press together until the glue dries.

6. Repeat until each shape is assembled, then glue them together.
