

The T-Virus is an **imaginary virus** from the Resident Evil video game. It was genetically-engineered by Umbrella Pharmaceutical, Inc. in 1978, and is based on the Ebola virus. The T-Virus was created solely to turn the infected into 'Bio-Organic Weapons' (or B.O.W.s).

The virus is fatal but the infected corpse is reanimated as a super-strong and intelligent Zombie. The virus spreads through oral transmission, usually by biting. There is no known cure.

Assembly Instructions:

1. Cut out shapes along outside edge.
2. Pre-crease all dashed lines with a ruler and a blunt-edged tool (i.e. a bone tool or pen cap).
3. Fold all dashed lines away from you (i.e. mountain fold).
4. Spread a thin layer of glue on a folded tab.
5. Place tab under corresponding side and press together until the glue dries.
6. Repeat until assembled.
7. Glue grey caps from page 2 on either end of cylinder.

Tyrant Virus

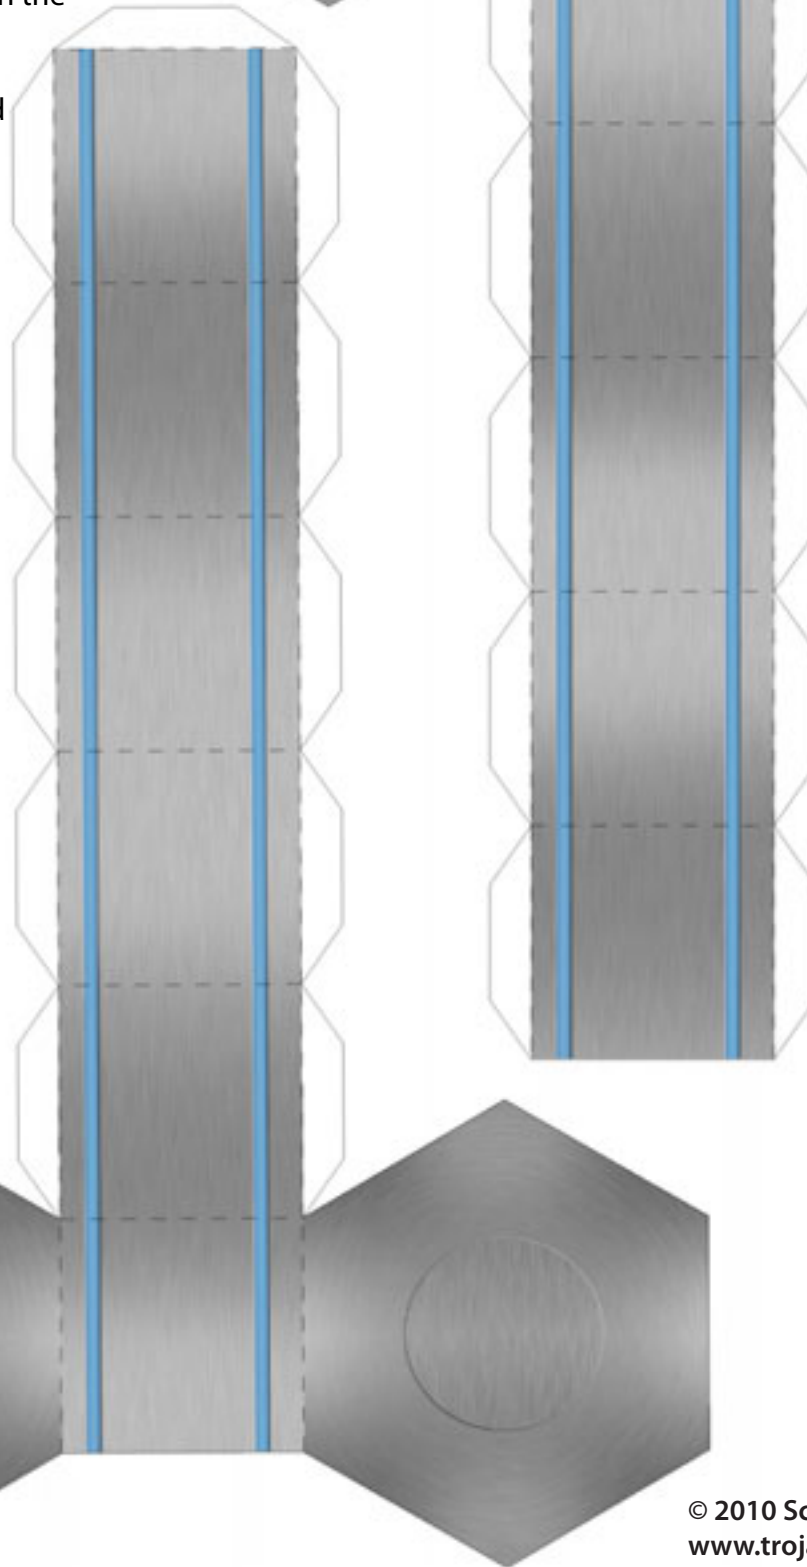

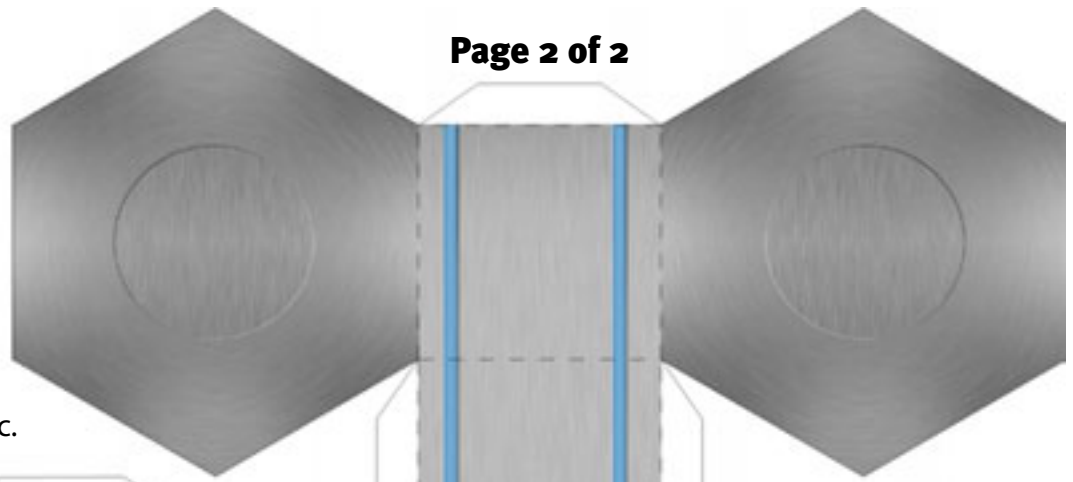

The T-Virus is an **imaginary virus** from the Resident Evil video game.

It was genetically-engineered by Umbrella Pharmaceutical, Inc. in 1978, and is based on the Ebola virus.

The T-Virus was created solely to turn the infected into 'Bio-Organic Weapons' (or B.O.W.s).

The virus is fatal but the infected corpse is reanimated as a super-strong and intelligent Zombie.

The virus spreads through oral transmission, usually by biting. There is no known cure.

Assembly Instructions:

1. Cut out both shapes along outside edge.
2. Pre-crease all dashed lines with a ruler and a blunt-edged tool (i.e. a bone tool or pen cap).
3. Fold all dashed lines away from you (i.e. mountain fold).
4. Spread a thin layer of glue on a folded tab.
5. Place tab under corresponding side and press together until the glue dries.
6. Repeat until each shape is assembled.
7. Glue grey caps on either end of green cylinder from page 1.
